

WHY GET VACCINATED?

- *Getting vaccinated will help keep you, your family, and your community healthy and safe.*
- *By getting vaccinated, you can help end the damage to the economy, prevent more illnesses and deaths in America, and eliminate and eradicate COVID-19.*
- *Vaccines will help bring this pandemic to an end.*
- *At 95% efficacy, the vaccine is extraordinarily effective at protecting you from the virus.*

VACCINE DEVELOPMENT

The groundbreaking cooperation between leading medical experts here in America and pharmaceutical companies globally has made a return to normal possible thanks to the COVID-19 vaccine. The speed of development was due to the sharing of research on a scale never attempted before – and every study, and every phase of every trial, was carefully reviewed and approved by a safety board at the FDA. The process was transparent and rigorous throughout, with continual oversight and expert approval.

VACCINE SAFETY

A safety board approved every study, and the FDA carefully reviewed the data from every phase of every vaccine trial.

SIDE EFFECTS

If you're concerned about side effects, we hear you. The likelihood of a severe side effect is less than 0.5%. When mild side effects occur, they are a normal sign your body is building protection to the virus, and most go away in a few days.
